

Project Manager (Data Consulting)

City

Tokyo, Japan (Roppongi Itchome area)

Your Role

You will be working with the Data Consulting team as a Project Manager. Your job is to support assigned projects, managing and delivering projects successfully. You will have the chance to expose yourself to the most advanced technologies and project management methodologies within a dynamic working environment.

There are currently around 30 ongoing projects related to storage and databases. For databases, they include *MongoDB, MariaDB, Oracle and PostgreSQL*. For storage, they include *Compellent, Powermax, Isilon, Unity*.

The duration of projects is generally 3 – 12 months, and the Project Manager will be expected to cover 4 to 60 people per month across these projects.

Key Responsibilities:

- Manage the overall project from start to finish.
- Gather and prepare formal project status reports.
- Follow up on the schedule
- Communicate with each team, covering both Application and Infrastructure teams
- Resource management within projects.
- Assist team members in overseas offices to come to Japan for support. Also involves assisting with any issues during the duration of their time in Japan.
- Attend project related meetings, documenting any points of discussion deemed necessary for the project's success.

About Us

Originally established as the core of SBI Group's FinTech strategy in July 2015, SBI BITS has fulfilled and surpassed this role, cementing its position as an up-and-coming Asian FinTech company with offices in Tokyo, Hong Kong and Dalian.

Currently, we provide full support of key technology for Japannext, the largest PTS by trading volume in Japan and accompanying services. We are also the primary provider of IT services to Japan's largest online retail trading brokerage, SBI Securities. By utilizing and developing cutting-edge advancements in financial technologies such as Blockchain KYC/AML, professional data

center management, low-latency colocation services, and one of the world's fastest matching engine, we supply clients with high financial solutions in an ever-evolving market.

We have gathered IT experts from all over the world and currently boast an international working environment of employees from over 40 countries. Top leaders, with more than 20 years of experience each in the FinTech industry, are spearheading the group.

Our identity is to be Japan's most modern FinTech Company that changes with the times, providing Financial Technologies based on customer needs, and ensuring that we're always innovating, always one step ahead, and always committed to the needs of the customer.

We have many new exciting projects planned ahead and always seeking for high caliber talents to join our dynamic teams. Do you want to be one of us?

Your Team

You will be working with a multi-national team and reporting to our Chief Data Officer. The DBA team consists of people who:

- Are willing and able to play multiple roles (for instance, help to develop application as application DBA)
- Embrace working in a diversified culture working environment
- Possess good communication skills and embrace knowledge sharing within team
- Are able to work independently and a good team player
- Like challenges and follow up with technology trends

What We Offer

Our employees are people who value teamwork with a result-driven mindset, who thrive in a challenging and diverse working environment. We welcome people who have similar backgrounds and mindsets to join us. We value your passion and commitment, and reward your performance.
