

## Junior BAU Support (Data consulting team)

### City

Tokyo, Japan (Roppongi Itchome area)

### Your role

Role is to provide Oracle/Postgresql/MySQL maintenance and enhancement support and to enforce risk governance, compliance and security standard technologies.

- Take care of Production Troubleshooting/Monitoring/Backup and Recovery architecture planning
- 24\*7 Production on-call L1 support
- Daily check for all Dev/UAT/PROD databases
- Support application release and validate SQL scripts to avoid production troubles.
- Improve document management and update/maintenance documentation for team.
- Create/Improve automation scripts to make BAU work more efficiently

### About us

Originally established as the core of SBI Group's FinTech strategy in July 2015, SBI BITS has fulfilled and surpassed this role, cementing its position as an up-and-coming Asian FinTech company with offices in Tokyo, Hong Kong and Dalian.

Currently, we provide full support of key technology for Japannext, the largest PTS by trading volume in Japan and accompanying services. We are also the primary provider of IT services to Japan's largest online trading firm, SBI Securities. By utilizing and developing cutting-edge advancements in financial technologies such as Blockchain KYC/AML, rock-solid data center management, low-latency colocation services, and the world's fastest matching engine, we supply clients with high financial solutions in an ever-evolving market.

We have gathered IT experts from all over the world and currently boast an international working environment of employees from over 40 countries. Top leaders, with more than 20 years of experience each in the FinTech industry, are spearheading the group.

Our identity is to be Japan's most modern FinTech Company that changes with the times, providing Financial Technologies based on customer needs, and ensuring that we're always innovating, always one step ahead, and always committed to the needs of the customer.

We have many new exciting projects planned ahead and always seeking for high caliber talents to join our dynamic teams. Do you want to be one of us?

### **Our culture**

We want people who value teamwork and a results-driven mindset, who flourish in a challenging and diverse working environment. We value your passion and commitment, and reward your performance.

### **Your team**

You will be working with a multinational team and report to our Head of DBA. The DBA team consists of people who:

- Are willing and able to play multiple roles (for instance, help to develop application as application DBA)
- Embrace working in a diversified culture working environment
- Possess good communication skills and embrace knowledge sharing within team
- Are able to work independently and a good team player
- Like challenges and follow up with technology trends

### **Requirements:**

- Possess either
  - i) 2+ years intensive experiences in Infra DBA (Oracle, MySQL or PostgreSQL) or
  - ii) 5+ years of IT non-DBA experiences (Network/Program/Storage/OS Administrator) and is keen in pursuing a career as a Database Administrator
- Flexible with 24\*7 support, including holiday/weekends/night onsite or remote support.
- Candidate with business level Japanese and Chinese language proficiency is highly preferred, as candidate is required to liaise on a daily basis with both Chinese and Japanese colleagues.

### **Nice to have:**

- Oracle Certified Professional (Oracle Master Gold) or Oracle Certified Professional MySQL Database Administrator
- Good English proficiency (both written and spoken)
