About Us

Originally established as the core of SBI Group's FinTech strategy in July 2015, SBI BITS has fulfilled and surpassed this role, cementing its position as an up-and-coming Asian FinTech company with offices in Tokyo, Hong Kong and Dalian.

As of now, we provide full support of key technology for Japannext, the largest PTS by trading volume in Japan and accompanying services. We are also the primary provider of IT services to Japan's largest online trading firm, SBI Securities. By utilizing and developing cutting-edge advancements in financial technologies such as Blockchain KYC/AML, rock-solid data center management, low-latency colocation services, and the world's fastest matching engine, we supply clients with high financial solutions in an ever-evolving market.

We have gathered IT experts from all over the world and currently boast an international working environment of employees from over 40 countries. Top leaders, with more than 20 years of experience each in the FinTech industry, are spearheading the group.

Our identity is to be Japan's most modern FinTech Company that changes with the times, providing Financial Technologies based on customer needs, and ensuring that we're always innovating, always one step ahead, and always committed to the needs of the customer.

We have many new exciting projects planned ahead and always seeking for high caliber talents to join our dynamic teams. Do you want to be one of us?

Our culture

We want people who value teamwork and a results-driven mindset, who flourish in a challenging and diverse working environment. We value your passion and commitment, and reward your performance.

Your team

You will be working in a team of 16 people in total. The team consists of 4 sub teams:
- Release team
- L1 support team
- L2 support/research team (which this role sits with)
- Application DBA team

We are looking to target potentials who have passion for cutting edge IT and would like to grow as a strong technical professional in the future.

Qualifications

- 3 - 5+ years of storage device maintenance experiences
- Rich experience and good knowledge in Storage & File system
- Rich experience in Unix-like operating systems
- Candidate with business level Japanese and Chinese language proficiency is highly preferred, as candidate is required to liaise on a daily basis with both Chinese and Japanese colleagues. (Fluent English proficiency is a plus)
